

PALO

The extraordinary and expressive nature of the Palo armchair comes from its form. Take a while to notice the soft lines with references to the human body, the recurring round outlines, the break lines and the hollows, all imbuing a relaxing sense of cosiness. The Palo armchair also comes in a soft version in which the softness and comfort are emphasised with a looser upholstery.

Palo's ergonomics and comfort are further enhanced by the optional adjustment mechanism that can change the backrest angle by 18°. In this position, the user can practically lie down, fully enjoying a moment of relaxation. The collection is complemented by a footrest.

With a multitude of base and finishing options, the collection can match different kinds of interiors, and its dynamic form makes it a highlight of the space.
